Kanban and Contribution Evidence

AjxOm / Budget Bites
Om Swaroop Reddy Udumula and Anton "A.J." Orea

Board and workflow

Board: https://app.clickup.com/90141772424/v/g/2kydwjm8-434

Workflow: Backlog, Ready, In progress, Review / test and Done. In progress policy: one active task per member. Review/test policy: two team tasks. A completed implementation is connected to its code, tests and documentation. Board screenshots and activity records are maintained separately by the team; the trace table below summarizes the repository evidence.

Contribution traces

Contribution	Repository trace	Validation
A.J.: Meal model and database	63ecb0a and 22798b8	SQLite CRUD, constraints and migration integration cases
A.J.: History screen	2f6f7c1 and edcf9b3	History display, receipt callback and large-text widget checks
Om: model, purchases and UI	41cd0ba, 40209f7, 309a618 and d45804e	Money rules, receipt CRUD, forms and navigation checks
Om: helper and testing	f64bc35, e815deb and e892649	Helper fixtures and two-emulator validation
Team integration	4994ec1 and merged PR #1	17 unit/widget tests; three integration cases per emulator

Integration reflection

Combining the branches exposed database-interface, identifier and navigation mismatches. The integration branch connected History to child purchase receipts through AppStore. Focused regression checks verified refreshed totals, receipt action targets and large-text layout before the merge to main.

Repository: https://github.com/Omswaroopreddyudumula/ajxom-budget-bites
Integration review: https://github.com/Omswaroopreddyudumula/ajxom-budget-bites/pull/1
Test evidence: evidence/final-unit-widget-tests.txt, final-phone-integration.txt and final-large-integration.txt.
