Kanban and Contribution Evidence

Budget Bites | AjxOm
Om Swaroop Reddy Udumula and Anton "A.J." Orea

Current ClickUp task overview and attachment captures, October 31, 2026.

Board: app.clickup.com/90141772424/v/b/2kydwjm8-534

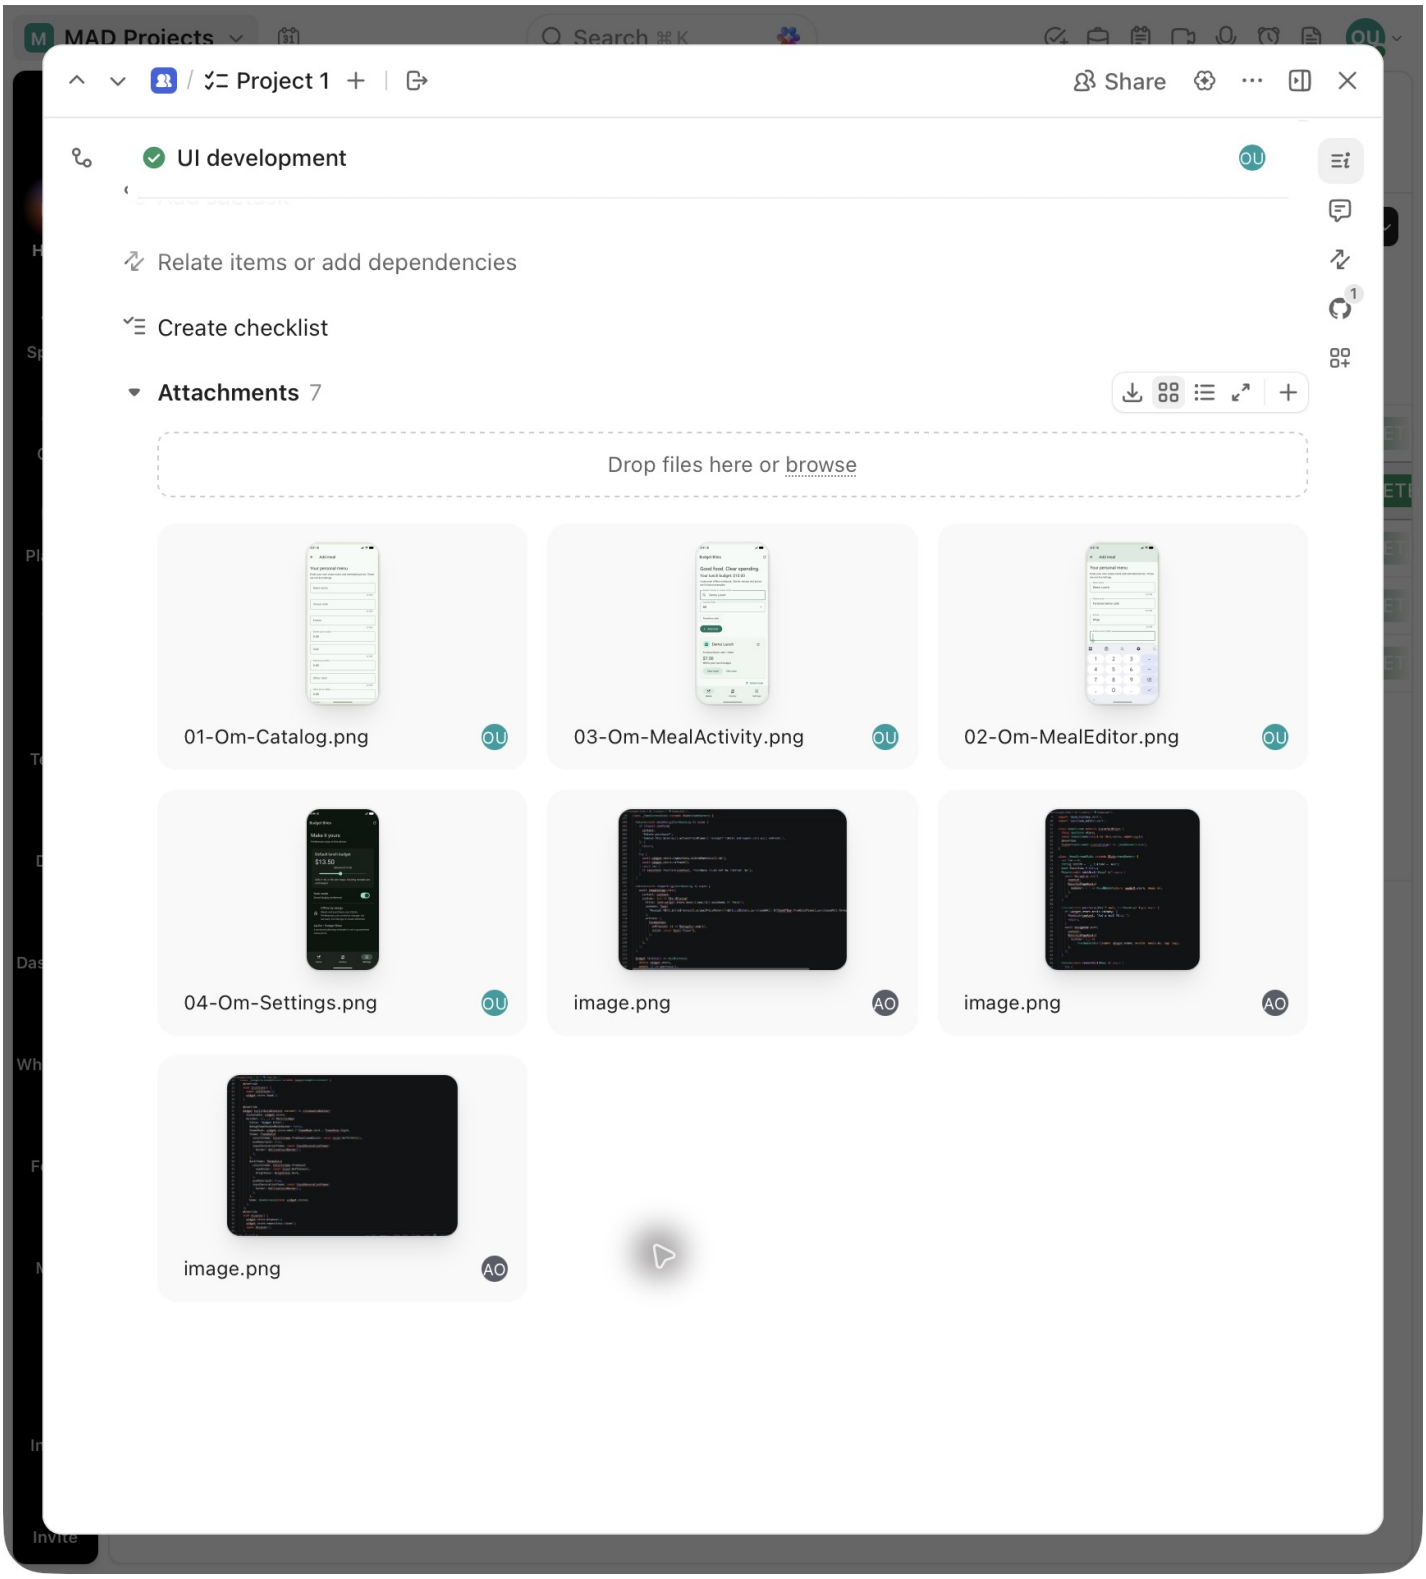

Task - code - test traces

Task / owner	Implementation trace	Verification
UI development / Om 86bck2xm9	309a618, d45804e MealEditor, AppStore, navigation	Form validation, History callbacks and large-text widget checks
Data layer / A.J. 86bck2xma	63ecb0a, 22798b8, 2f6f7c1, edcf9b3 Meal model, database, History	SQLite CRUD, relationships and migration integration cases
Testing / Om 86bck3cwq	f64bc35, e815deb, e892649 Unit/widget and device fixtures	17 unit/widget tests; three integration cases per emulator

Integration reflection: connecting the branches exposed identifier, database-interface and navigation mismatches. Shared AppStore wiring and focused History regression checks resolved these before the merge to main. The final test logs retain the executed results.
